I subscribed to XM radio because the FCC caters to the religious right-wing in this country and ABSOLUTELY CANNOT keep their nose out of people's business. Censorship on public radio stations is ridiculous and on pay radio stations is entirely out of the question. If people are offended by what's on the radio station, I suggest the power button be utilized instead of telling people what they should and should not listen to.

As for the lobbyists representing the NAC trying to get satellite radio to stop pay radio stations from broadcasting material of a local interest, I have a suggestion. How about forcing the local radio stations to make changes in their substandard broadcasts in order to improve themselves.

I pay a monthly fee for the pleasure of hearing what I want to hear without commercials. Get your FUCKING NOSES OUT OF MY BUSINESS!
